ANNUAL MANAGEMENT REPORT ON THE ACTIVITY OF ERG CAPITAL - 3 ADSIP FOR 2009

23 February 2010

"ERG Capital – 3" ADSIP ("ERG – 3" or "the Company") is a Bulgarian joint stock company with special investment purpose. Its activity is governed by the Special Investment Purpose Companies Act ("SIPCA") and its related regulations. The Company raises funds through the issue of securities and uses these funds to acquire real estate, in effect implementing real estate securitization.

In 2007, the Company was licensed as a Special Investment Purpose Company by the Financial Supervision Commission ("FSC"). In the same year the Company increased its capital by 50%.

Since its listing as a public company ERG -3 complies with its obligations under the agreements to which it is a party. Its activity is oriented towards managing and/or developing five real estate investments in the cities of Sofia, Varna, Stara Zagora and Bourgas acquired in 2006, 2007 and 2008 and described below and in Note 5 to the Financial Statements.

ACTIVITY REVIEW

On 25 April 2007 the Financial Supervision Commission approved the prospectus for mandatory initial capital increase of ERG - 3 and licensed the Company as a company with special investment purpose. The Company increased its capital by 50%. The Company sold 700,000 rights, against which 700,000 shares were subscribed at issue price of BGN 20 per share. As a result the Company received a total of BGN 15,941 thousand and used the proceeds to pay amounts due for a real estate investment acquired in 2006 and to purchase new real estate investments.

In the following discussion we present some comments regarding important aspects of the activity of the Company during 2009:

1. Liquidity

As of 31 December 2009 the Company's cash and cash equivalents are in the amount of BGN 2,530 thousand. The other current assets are in the amount of BGN 206 thousand. The current liabilities are in the amount of BGN 1,224 thousand, of which EUR 350 thousand is the current portion of the bank loan used for financing the development of the Zagora property.

In March 2009 the Company issued a 3-year fixed rate EUR 6,514 thousand bond, that was subsequently listed at the Bulgarian Stock Exchange Sofia ("BSE-Sofia"), with which it refinanced the EUR 5,000 thousand loan for the Sofia Ring property.

In March 2009 the Company completed the first stage of the Zagora project, leased to the furniture retailers Aiko Multi Concept EOOD and Mobbo EOOD and in August 2009 it completed the second stage of the project, leased to the food retailer Markator-B EOOD. Under the respective lease agreements, and the annexes signed subsequently (See 6. Important events after the date of the Financial Statements below) the reduction in the total expected fixed rent over the next four years is approximately BGN 3.4 million. The Company will be receiving also a percentage of the sales of part of the tenants if they exceed certain thresholds.

As of 31 December 2009 the Company has unused line of credit from the Bulgarian American Credit Bank AD ("BACB") in the amount of EUR 1,000 thousand.

The available cash and the unused loans of the Company are sufficient at this stage to cover its liquidity needs.

2. Capital resources

As of 31 December 2009 ERG – 3's shareholders' equity is approximately BGN 27,300 thousand. The capital of the Company was paid in full and despite the accumulated losses for 2009 and 2008, it is currently sufficient to support the Company's business activity. ERG - 3 does not plan any further capital increases.

For each of the properties described below and in Note 5 to the Financial Statements, the Company has two alternatives: a/ to develop it as a commercial property and lease it out and b/ to sell it without development with a premium. In the case of developing a property, if this is considered to be more beneficial to the shareholders by the management, the Company will have significant capital expenses for construction works, which will be financed with bank loans.

3. Information about the properties, owned by ERG-3 (Art. 41.(2).(5). Ordinance 2 of FSC)

Share of rented properties in 2009: 10.43%

4. Results from operations

The Company ended 2009 with a loss of BGN 1,067 thousand. In the year, due to the worsening market situation, the Company did not sell any property.

The Company generated rental income in the amount of BGN 2,220 thousand. The net rental income, after direct expenses for the investment property and depreciation, amounted to BGN 1,604 thousand.

In the meantime the Company incurred expenses, the most significant of which was the interest expense in the amount of BGN 1,962 thousand comprising mainly the interest paid on the bond used to refinance the line for the acquisition of the Sofia Ring property and on the loans used to finance the development of the Zagora property.

The Company incurred operating expenses in the amount of BGN 799 thousand. BGN 495 thousand of these represent fees to the servicing company SCA under a servicing agreement dated 14 July 2006. Out of the BGN 1,881 thousand fees due to SCA BGN 1,612 thousand were paid in 2009. The rest was accrued as a payable as at 31 December 2009.

5. Risks

The Company is operating in the area of real estate investment and the main risks it faces are related to the development of the real estate sector in Bulgaria and to retail space in particular. Listed below are the main Company specific risk factors:

- · Rising construction costs
- Rising interest rates
- Market price decreases of both real estate assets and rental levels
- · Increase in the cost of insurance
- Dependence of the income stream on the financial condition of the future tenants

- Unexpected maintenance expenses
- Risk of occurrence of an uninsured event.

In addition to the Company specific risk factors, ERG-3 also faces some general risks, associated with doing business in Bulgaria. These are as follows:

- Risk of unfavorable legislative changes
- Risk of economic downturn
- Credit risk
- Currency risk
- Inflation risk

During 2009 the real estate market in Bulgaria worsened significantly and this trend is expected to continue at least in the first half of 2010. This and the worsening macroeconomic situation could significantly adversely affect the Company's financial condition and results of operations. It could have negative affect on the tenants' financial position and/or result in reduction of the prices of the real estate properties owned by the Company.

6. Important events after the date of the Financial Statements

In February, 2010 the Company agreed to change the method for determining the rent in certain lease agreements by lowering the fixed rent amounts and adding a provision that provides additional rent as a percentage of sales. This change acknowledges the effect of the economic crisis but at the same time provides an upside potential when the economy rebounds. The reduction in the total expected fixed rent over the next four years is approximately BGN 3.4 million. The amended lease agreements also include an option for the Company, under certain conditions, to cancel the lease agreements with short notice.

No other important events that could have material effect on the operating and financial results of the Company have happened after the date of the Financial statements - 31 December 2009.

7. Expected developments and plans for 2010

At this stage, the Company does not plan any further capital increases or new real estate acquisitions. For each of the properties described above and in Note 5 to the Financial Statements, the Company is currently exploring the following alternatives: a/ develop a commercial property and lease or b/ sell without development. In the case of developing a property, if this is more beneficial to the shareholders, the Company will have significant capital expenses for construction works, which will be financed with bank loans.

8. Research and development

ERG-3 is operating in the real estate sector and is not involved in any research and development activities.

9. Use of financial instruments

In 2009 the Company issued a secured bond in the amount of EUR 6,514 thousand to refinance existing bank line of credit.

10. Branches

ERG-3 has not registered and does not have any branches.

11. Share buy backs

Therefore, by virtue of the law, ERG-3 is not allowed to purchase or own any of its shares and the Company has never traded in its own shares.

Pre-emption Rights

Each holder of shares has pre-emptive rights to subscribe for any new shares or convertible bonds issued by the Company pro rata to its existing holding of shares. The number of shares required to subscribe for one new share or convertible bond must be specified in the shareholder resolution approving the share capital increase. Under Bulgarian law, pre-emption rights may not be removed in any way, unless those pre-emption rights are automatically removed by operation of Bulgarian law, which occurs whenever shares are issued for the following purposes: (i) to be allotted to holders of interests in another company as part of a merger or a non-cash tender offer for the shares in that company; (ii) to be allotted to holders of convertible bonds or warrants due to the conversion of those instruments.

If the capital increase is authorized by a shareholder resolution, the pre-emption rights accrue to those persons registered as shareholders at the Central Depository on the ex-dividend date, i.e. 14 days following the date of the shareholders' resolution. If the capital increase is authorized by a resolution of the Board of Directors, the pre-emption rights accrue to those persons registered as shareholders at the Central Depository on the seventh day after the publication of the announcement of the rights issue in the Bulgarian State Gazette. The first date on which pre-emption rights may either be: (1) exercised to subscribe for new shares or convertible bonds; or (2) traded on the BSE is required to be specified in the announcement of the rights issue. The final date for the exercise of pre-emption rights must be between fourteen and thirty days from

the date set for the first exercise of such rights. All rights not exercised within this time must be offered to the public by means of an auction organized by the BSE five business days after the final date on which rights may be traded. This auction is open for a period of one day. Any right acquired pursuant to the auction must be exercised within ten business days of the auction.

This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

Auditor's responsibility

Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

Opinion

In our opinion, the financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2009, and of its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union.

Emphasis of matter

Without qualifying our opinion, we draw attention to the following:

- (a) As disclosed in note 15 to the accompanying financial statements the Company is exposed to property price and market rental risks. These risks are related to the global economic crisis that limited the credit availability worldwide and affected negatively the real estate prices and the rental rates. If the crisis continues it may have material adverse effects on the Company's future financial position, liquidity and results of operations.
- (b) We draw attention to note 5 of the accompanying financial statements where based upon the result of the required annual appraisal, the fair value of the investment properties is disclosed. Due to the inherent uncertainty related to any valuation and especially in the current market conditions, where the real estate market has deteriorated significantly, and very limited number of transactions have taken place, the disclosed fair values may differ significantly from the values that would have been used had an active market for the properties existed, and the differences could be material.

Report on other legal and regulatory requirements - Annual report on the activities of the Company according to article 33 of the Accountancy Act

Pursuant to the requirements of the Bulgarian Accountancy Act, article 38, paragraph 4 we have read the accompanying Annual report on the activities of the Company. The Annual report on the activities of the Company, prepared by the Company's management, is not a part of the financial statements. The historical financial information presented in the Annual report on the activities of the Company, prepared by the management is consistent, in all material respects, with the annual financial information disclosed in the financial statements of the Company as of December 31, 2009, prepared in accordance with IFRS, as adopted by the European Union. Management is responsible for the preparation of the Annual report on the activities of the Company dated February 23, 2010.

1 Organization and operations

ERG Capital - 3 ADSIP ("the Company" or "ERG") was registered on 13 July 2006 as a Bulgarian joint stock company with special investment purpose with the sole purpose to invest the funds raised in real estate. The main shareholder of the Company is the Bulgarian-American Enterprise Fund ("BAEF"), which holds 46.7% of the share capital plus an additional 6.7% through a wholly owned subsidiary. Under the Company's by-laws, ERG has a fixed term of existence that ends on 31 December 2014.

ERG activities and operations are governed by the provisions of the Special Investment Purpose Companies Act ("SIPCA"), the Public Offering of Securities Act and related secondary legislative acts. The Financial Supervision Commission is responsible for supervision of the Company's compliance with the laws and regulations. The SIPCA requires the Company's cash and securities to be held at a custodian bank, which is United Bulgarian Bank AD. Serdika Capital Advisors Permanent Establishment ("SCA") is the servicing company for ERG.

On 25 April 2007 the Company received its license to operate as a company with special investment purpose from the Financial Supervision Commission.

The Company's registered office is located at 3 Shipka Str., Sofia, Bulgaria.

2 Summary of significant accounting policies

Basis of Preparation

The Company prepares and presents its financial statements in accordance with International Financial Reporting Standards ("IFRS"), issued by the International Accounting Standards Board ("IASB") and the interpretations, issued by the International Financial Reporting Interpretations Committee ("IFRIC"), as approved by the European Union Commission ("the Commission") and applicable in the Republic of Bulgaria. IFRS as adopted by the Commission do not differ from IFRS, issued by the IASB, and are effective for reporting periods ended as of 31 December 2009, except for certain requirements for hedge reporting in accordance with the IAS 39 Financial Instruments: Recognition and Measurement, which has not been adopted by the Commission. The management believes that if the hedge requirements have been approved by the Commission it would have no influence on these financial statements.

During 2009 the Company has adopted all new and revised IFRS by IASB, as approved by the Commission, effective for 2009, which refer to the Company's business. The adoption of these amendments and interpretations has not resulted in changes in the accounting policies of the Company.

Certain IFRS, amendments to IFRS and interpretations have been adopted by IASB and IFRIC as of the date of the financial statements, but are effective for annual periods beginning on or after 1 January 2010. The Company has not elected earlier application of those IFRS and IFRS revisions.

These financial statements have been prepared on the historical cost basis. The preparation of financial statements in conformity with IFRS requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Although these estimates are based on management's best knowledge of current events and actions, actual results may differ from those estimates.

The statement of financial position presents assets and liabilities in decreasing order of liquidity and does not distinguish between current and non-current items. These financial statements are prepared for

> 35 356

BGN in thousands except per share amounts or unless otherwise stated

general purposes and provide information for the financial position, operations and cash flows of the Company for the year ended 31 December 2009.

Functional and reporting currency

The functional currency of the Company is the national currency of Bulgaria - BGN. The financial statements are presented in BGN.

Foreign currency

Foreign currency transactions, i.e. transactions denominated in currencies other than BGN, the Company's functional currency, are accounted for at the exchange rates prevailing at the date of the transactions. Gains and losses resulting from the settlement of such transactions and from the translation of monetary assets and liabilities denominated in foreign currencies are recognized in the statement of comprehensive income.

Cash and cash equivalents

For the purposes of the financial statements, the Company considers all highly liquid financial instruments and other financial instruments with maturity of three months or less to be cash equivalents.

Real estate investments for future use as investment property

Real estate investments for future use as investment property are reported according to the Improvements to IFRS issued in May 2008 and effective 1 January 2009 whereas IAS 40 "Investment property" applies to property that is being constructed or developed for future use as investment property. Until 31 December 2008 IAS 16 "Property, plant and equipment" was applied to property that was acquired with the purpose of being developed for future use as investment property until development was completed. Upon completion the Company applied IAS 40 "Investment property". The Company has not elected earlier application of the amendments to IAS 40 in accordance with paragraph 85B of IAS 40.

Investment property

Investment property is property (land or a building-or part of a building-or both) held to be leased under long term operating leases or for capital appreciation or both in accordance with the Improvements to IFRS issued in May 2008 and effective 1 January 2009. An investment property is measured initially at its cost. Cost comprises its purchase price and any directly attributable expenditures, including taxes and fees directly related to the purchase and other transaction costs. For all new investments started after 1 January 2009 borrowing costs that are directly attributable to the acquisition, construction and development are capitalised as part of the cost of the investment property, in accordance with the amendments to IAS 23 "Borrowing costs". Construction cost is recorded based upon stages of completion. Development cost is recorded at the time the services are performed. After the initial recognition the investment property is accounted for in accordance with the cost model - cost less accumulated depreciation and less accumulated impairment losses as determined by management. The SIPCA requires that ERG's investment property is appraised at the end of each fiscal year. Depreciation of the buildings starts when they are available for use and is based on the straight-line method over their estimated useful lives. The annual rate of depreciation used for the buildings is 4%.

Borrowings

Borrowings are recognized initially at 'cost', being their issue proceeds (fair value of consideration received) net of transaction costs incurred. Borrowings are subsequently stated at amortized cost and any

BGN in thousands except per share amounts or unless otherwise stated

difference between net proceeds and the redemption value is recognized in the statement of comprehensive income over the period of the borrowings using the effective interest method.

Rental income recognition

Rents from operating leases are recorded as rental income as they become due in accordance with the lease contracts.

Interest income and expense recognition

Interest income and expense are recognised in the statement of comprehensive income for all interest bearing instruments using the effective interest method. Interest income includes interest on bank deposits. Interest expense includes interest on borrowings, debt securities and payables.

Tax status and dividend requirement

The Company was formed under the SIPCA and is exempt from Bulgarian corporate income taxes as long as it distributes to shareholders 90% of its profit for the year or 90% of its retained earnings if retained earnings is less than the profit for the year. Considering the SIPCA requirement, the Company accrues the required dividend as of the end of each fiscal year and recognizes this dividend as a liability at the statement of financial position date, meeting the criteria of a present obligation as defined in IAS 37.

The lease contract is non-cancellable and the lessees provided bank guarantees for a certain number of monthly rent payments. In addition the owner of AIKO Multi Concept EOOD and Mobbo EOOD provided a personal guarantee.

The lease contract contains an option to extend the lease for 10 years.

In November 2007 ERG and PVN Sofia EOOD executed an agreement under which PVN Sofia EOOD has to construct a parking lot with an area of 875 sq.m. in exchange of subsequently leasing the parking lot. In March 2008 the construction was completed and according to the agreement the Company leased the parking lot until March 2009.

15 Financial Risk Factors

The Company's activities expose it to a variety of financial risks: credit risk, interest rate risk, liquidity risk and market risk (including currency and price risk).

Credit risk

The Company is exposed to credit risk in its investment activities. Credit risk is the risks that counterparty will be unable to pay amounts in full when they become due. ERG limits the credit risk by ensuring that rental contracts are made with customers with an appropriate credit history and also by having in place company guarantees from the lessees' parent companies for prompt and accurate performance of the obligations under the rental contracts.

Interest rate risk

The interest rate risk relates to the potentially adverse impact of interest rate fluctuations to the Company's profit for the year and equity value. It is the Company's policy to reduce the interest rate risk on floating rate loans through the use of interest rate swaps if necessary. This reduces to a large extend the overall interest rate risk. If the interest rate on Raiffeisenbank Bulgaria loan (Note 9) experience

increase/decrease by 0.5% in the next 12 months period, the interest expense for the year would increase/decrease and the profit for the year would decrease/increase with approximately EUR 0.05 million (BGN 88), respectively.

Liquidity Risk

The liquidity risk refers to the risk that the Company might not have sufficient cash to meet its obligations and arises from mismatch in cash flows. For the Company, the primary liquidity risk relates to its dependence on the payments of rents in order to service the borrowings. At any point of time the Company maintains a positive balance between the incoming and outgoing cash flows on its rents and borrowings.

Market risk

Currency Risk

The Company is exposed to the effects of fluctuations in the prevailing foreign currency exchange rates on its financial position and cash flows. Rent receivables, borrowings and a significant amount of interest and operating expenses are denominated in EUR. The Company does not maintain positions in currency other than EUR and BGN. The BGN/EUR exchange rate of BGN 1.95583 for EUR 1 is fixed under a Currency Board arrangement.

Price risk

The Company is exposed to property price and market rental risks. This risk has increased recently as a result of the global financial crisis that limited the credit availability worldwide and affected negatively the real estate prices and the rental rates. The crisis affected Bulgaria and the local real estate market in the second half of 2008 and may have material adverse effects on the Company's financials and results of operations should it last beyond year 2010. It is the Company's policy to reduce this risk by only investing in high quality properties and leasing them to good quality tenants with favorable terms and guarantees.
