The capital of the company amounts to 4 699 000 BGN and has been fully paid as contribution in kind – 4 694 000 BGN and 5 000 BGN in cash.

The group operates mainly in the field of exploration and development of energy projects concerning electrical energy production from renewable sources.

(c) Basis of preparation

The present consolidated interim financial statement is prepared in accordance with the requirements of the International Financial Reporting Standards (IFRS) and IFRIC interpretations, adopted by the European Union (EU) and the Bulgarian legislation.

New and amended standards, adopted by the Group

There are no IFRS or IFRIC interpretations that will enter into force for the first time for the financial year beginning January 1, 2012, that could have significant impact on the group.

New standards and interpretations issued but not yet entered into force

At the date of issue of approval of these financial statements are issued, but not yet effective for annual periods beginning on January 1, 2012, several new standards, revised standards and interpretations that have not been adopted for the earlier application by the group. The management has concluded that the following would have a potential impact in the future for changes in accounting policies and financial statements of the group for the following periods:

- *IAS 27 (amended 2011) Separate Financial Statements (effective for annual periods beginning on 1/1/2013 - not adopted by the EC)*. Standard is reissued with changed name as part of it, which concerned the consolidated financial statements is entirely separated into new standard - IFRS 10 Consolidated Financial Statements. Thus, the standard remained included

only the reporting of investments in subsidiaries, associates and joint ventures on the level of individual statements.

- *IFRS 10 Consolidated Financial Statements (effective for annual periods beginning on 1.01.2013 - not adopted by the EC)*. This standard supersedes in its significant part IAS 27 (Consolidated and Separate Financial Statements) and SIC Interpretation 12 (Consolidation - Special Purpose Entities). It's main objective is to establish principles and the way of preparation and presentation of financial statements when an entity controls one or more other entities. It redefines the concept of "control" that contains three components, and defines control as the only basis for consolidation. The standard establishes general mandatory rules for the preparation of consolidated financial statements.

- *IFRS 12 Disclosure of interests in other entities (effective for annual periods beginning on 1.01.2013 - not adopted by the EC)*. This standard sets out requirements for the disclosures in the financial statements concerning all interests of the reporting entity in other companies and entities, including also the effects and risks of such interests.

- *IFRS 13 Fair Value Measurement (effective for annual periods beginning on 1.01.2013 - not adopted by the EC)*. This standard is a united source of methodological guidelines, containing precise definition of "fair value", rules and methods of its measurement and more extensive disclosure requirements about fair value measurement for the purposes of IFRS. It covers both financial instruments and non-financial assets and liabilities for which IFRS require or permit the application of fair value.

The present interim financial statement is a consolidated financial statement. The investments in both subsidiary companies are eliminated against the equity of the subsidiary companies. All assets, liabilities, incomes and costs of the subsidiary companies are included in the consolidated interim financial statement of ENERGONI JSC under the full consolidation method after elimination of the balances and transactions within the group.

The consolidated interim financial statement of the group as of 31.12.2012 is prepared in accordance with the principles of historical cost and going concern. The management of the group confirms that its development plans do not foresee the activity be terminated into the indefinite future. If substantial uncertainties are known by the management and they may cause significant doubt upon that the group can continue its activity, these uncertainties will be disclosed.

During the the next accounting period are pending the following development goals of the group:

1. Completion of the preparation of the first projects for entering phase "Building".
2. Completion of the acquisition of funding for the projects.
3. Completion of the construction and furnishing of office space, by which to complete the administrative organization of the group.

The financial statement has been prepared in the national currency of the Republic of Bulgaria – bulgarian lev (BGN). Since January 1 1999 Bulgarian lev has been fixed to the Euro: 1.95583 leva = 1 Euro. The data in the statements and the notes thereto are presented in thousands of BGN, unless otherwise is explicitly indicated.

The presentation of financial statements in accordance with International Financial Reporting Standards requires management to make best estimates, accruals and reasonable assumptions that affect the reported amounts of assets and liabilities, income and expenses and the disclosure of contingent receivables and liabilities at the reporting date. These estimates, accruals and assumptions are based on information available at the date of the financial

statements, because of that the actual future results could be different (as in times of financial crisis, the uncertainties are more significant).

2. Comparative data

The present consolidated interim financial statement has been prepared in accordance with IAS 34 Interim Financial Reporting. According to Bulgarian Law on Accountancy the fiscal year ends on December 31 and the companies are obliged to submit their statements up to this date together with a comparative data for the same date of the previous year. The comparative data for the interim financial statements shall be presented in accordance with IAS 34 Interim Financial Reporting requirements.

3. Basic elements of the accounting policy

The group adheres to a common accounting policy – the accounting policy of the mother company

(a) Foreign Currency Dealings

Foreign Currency transactions are translated in BGN at the exchange rate of the Central Bank ruling on the transaction date. The cash assets and liabilities, denominated in foreign currency on the balance date are translated in BGN at the closing exchange rate of the Central Bank as of 31.12.2012. The foreign currency exchange differences are included in the Income statement.

(b) Property, plant and equipment

As property, plant and equipment are reported the assets which fulfill the IAS 16 criteria and its value is higher or equal to 700 BGN. The assets with a value that is lower than the above-stated are reported as operating costs for the acquisition period in accordance with the approved accounting policy. Each property, plant or equipment shall be evaluated when acquired at acquisition price defined in accordance with the IAS 16 requirements.

The chosen model by the group for the subsequent measurement of property, plant and equipment is the model of the acquisition cost under IAS 16 - acquisition cost less any accumulated depreciation and accumulated impairment losses.

Consecutive expenses related to property, plant or equipment are reported as an increase in the net book value of assets, when there is a chance that the company might gain economic profits higher than the originally assessed standard of performance. In all other cases the consecutive expenses shall be recorded as operating costs for the period.

Tangible fixed assets are depreciated under linear method over the expected useful life period determined at the time of asset acquisition.

The average useful life in years for the general groups of tangible fixed assets is as follows:

Group	Years
Buildings and installations	25
Machinery	3.3
Vehicles	4
Fixtures and fittings	6.7
Computers and peripheral devises	2

Land and expenses related to the acquisition of the tangible fixed assets do not undergo depreciation.

The applied depreciation rates are based on the estimated useful life.

As of 31.12.2012 ENERGONI JSC and its subsidiary companies have the following properties, plant and equipment.

(Thousand of BGN)

Group	Carrying value	Depreciation and amortization	Net book value
Land	70	-	70
Buildings	42	16	26
Equipment	9	4	5
Computers and peripheral appliances	12	9	3
Vehicles	17	17	-
Fixtures and fittings	107	28	79
Tangible fixed assets in progress	3367	-	3367
Total:	3624	74	3550

(c) Intangible assets

As intangible assets are reported assets that comply with the intangible assets definition and meet the criterion concerning the reporting of intangible assets stipulated in IAS 38.

Upon acquisition, intangible assets are reported at acquisition cost.

Intangible assets with an indefinite useful life - The chosen model by the group for the subsequent measurement of intangible assets with an indefinite useful life is the revaluation model according to IAS 38 ***Intangible Assets*** - after initial recognition, intangible assets are accounted at revalued value, which is its fair value at the date of revaluation less any subsequent accumulated depreciation and any accumulated losses from revaluation. An increase and decrease in the carrying value of intangible assets with an indefinite useful life as a result of revaluation is subject to paragraphs 85 and 86 of IAS 38.

Intangible assets with a finite useful life - The chosen model by the group for the subsequent measurement of intangible assets with finite useful life is the model of the acquisition cost according to IAS 38 ***Intangible Assets*** - after the initial recognition of an intangible asset it is accounted at its acquisition cost less accumulated depreciation and any accumulated impairment losses. (paragraph 74 of IAS 38)

As of 31.12.2012 the group owns the following intangible assets with an indefinite useful life:

- Patent with a carrying value of BGN 509 000 thousand, which according to paragraph 107 of IAS 38 do not have to be depreciated. According to 108 of IAS 38 ***Intangible assets*** and IAS 36 ***Impairment of asset***, the group is obliged to perform an impairment test for indefinite-lived intangible assets by comparing asset recoverable amount with its book value.

a/ annually; and

b/ when there is a chance of intangible asset impairment.

It is assigned to an independent licensed appraiser the preparation of a new market valuation of intangible non-current asset as of 31.12.2012, which will be included in the final annual financial statements of the company for 2012.

The amount of BGN 509 000 thousand has been proportionally allocated according to the owned patent shares between ENERSONI JSC and its subsidiary companies as follows:

Company name	Re-evaluated value (thousand of BGN)	% share
Energoni JSC	497 344	97.71
Electron - Bulgaria AD	4 377	0.86
Alpower - Bulgaria AD	7 279	1.43
Total :	509 000	100.00

As of 31.12.2012 the group owns the following intangible assets with finite useful life:

- License № L-258-01/04.02.2008 for production of electrical energy issued by SEWRC. License is issued under Art. 19 of the Ordinance on licensing of activities in the energy sector. With this license SEWRC allowed the production of electrical energy by new energy object – photovoltaic park after its construction. Its net book value as of 31.12.2012 is BGN 13 thousand.

- License № L-240-01/2007 for production of electrical energy issued by SEWRC. License is issued under Art. 19 of the Ordinance on licensing of activities in the energy sector. With this license SEWRC allowed the production of electrical energy by new energy object - Wind Park Dobrin after its construction. Its net book value as of 31.12.2012 is BGN 13 thousand.

- License № L-259-01/2008 for production of electrical energy issued by SEWRC. License is issued under Art. 19 of the Ordinance on licensing of activities in the energy sector. With this license SEWRC allowed the production of electrical energy by new energy object after its construction. Its net book value as of 31.12.2012 is BGN 13 thousand.

(d) Impairment of tangible and intangible fixed assets

In the event that facts and circumstances indicate that the net book value of company’s tangible and intangible fixed assets is non-refundable within company’s activities, impairment shall be performed. An impairment loss is recognized for the amount by which the net book value exceeds the recoverable amount which is higher than assets net selling price and its value in use. For the purposes of impairment testing assets are grouped to the highest possible analytical degree, for which identifiable cash flow are present.

With regard to the provisions of IAS 36 *Impairment of assets* the group believe that negative changes are not likely to occur in its field of operation.

As of 31.12.2012 the group does not have impairment of tangible and intangible fixed assets.

(e) Investments in subsidiary companies, associated companies and minority shares

On 01.09.2011 "Electron-Bulgaria" AD acquires controlling stake of the following companies:

(Thousand of BGN)

Company	Amount of the investment	Relative share of the participation (%)
Bolkan Solar AD	23 550	51
Eko Solar Energy AD	45	90
RES Electric AD /RNK Electric/	100	100
Total:	23 695	

On 01.09.2011 "Alpower-Bulgaria" AD acquires controlling stake of the following companies:

(Thousand of BGN)

Company	Amount of the investment	Relative share of the participation (%)
Bolkan Energy AD	40 218	51
Sofia Wind Park AD	39 141	51
Total:	79 359	

On 01.09.2011 the group acquires minority interest in "Consortium Elgrup" AD, UIC 131562294, amounting to BGN 7 thousand - 14% of the company's capital, through its subsidiary company "RES Electric" AD.

(f) Investment property

The group does not report investment properties in accordance with IAS 40.

(g) Inventories

Inventories are current tangible assets such as:

Materials acquired through a purchase and intended for direct sales.

Inventories are evaluated at a value lower than the purchase cost or the net realizable value.

Purchase cost includes the sum of all purchasing costs and other costs incurred as a result of bringing the asset to the location and in appropriate condition.

Subsequently they are included in the carrying amount of goods sold through a sale under weighted average value method.

As of 31.12.2012 the group has work in progress amounting to BGN 62 thousand. Under contract from 13.05.2008 with "Intercapital Property Development" ADSIC "RNK Electric" AD has undertaken to work on building site - the electrical part. Construction is done on stage before act obr.15, value of BGN 62 thousand and consists of input transformers and equipment and also materials for construction of an external power supply of the object: Hotel - Borovets investor "Intercapital Property Development" ADSIC.

(h) Trade and other receivables

As loans and receivables initially occurred in the company are classified receivables from direct provisions of goods, services, cash and cash equivalents of debtors. Initially, receivables and loans are valued at prime cost.

After initial recognition, loans and receivables from clients and suppliers which are with no fixed maturity are reported at prime cost.

Loans and receivables from customers and suppliers with a fixed maturity are reported at their depreciation cost. The effective interest rate is the original interest rate stated in the contract.

As of date of the financial statement a review concerning assessment of impairment due to uncollectability shall be performed. The assessment of impairment shall be based on individual approach for each receivable according to management's decision.

Tax refund shall be presented at the original amount of the claim.

Other receivables shall be presented at prime cost.

As short term receivables are classified receivables that are:

- With no fixed maturity;
- Fixed maturity and up to one year residual maturity term from the date of the financial statement.

As long term receivables are classified receivables with fixed maturity and residual maturity of over a year term.

Trade and other receivables are reported at their nominal value less impairment losses.

As of 31.12.2012 the group has the following trade and other receivables:

(Thousand of BGN)

Receivables	Energoni JSC	Elektron-Bulgaria AD	Alpower-Bulgaria AD	Total
VAT receivables	134	-	-	134
Advance payments to suppliers	303	-	-	303
Guarantees	-	3	-	3
Intercompany accounts	-	8	5	13
Other receivables	-	3750	6250	10000
Total:	437	3761	6255	10453

(i) Cash and cash equivalents

Cash in BGN is evaluated at face value which corresponds to its fair value at the reporting date. Bank deposits are reported at nominal value and the due interest accrued under the contract at the reporting date.

Cash and cash equivalents, denominated in foreign currency, are translated at the central exchange rate of Bulgarian National Bank at the reporting date.

Cash balances include cash on hand and at bank as follows:

(Thousand BGN)

Cash	Amount
Cash on hand	115
Cash at bank	3
Total:	118

(j) Financial risk management

In the normal course of economic activity the group may be exposed to various financial risks, the most important of which are market risk (including currency risk, risk of change in fair value and price risk), credit risk, liquidity risk and risk interest-bearing cash flows. The overall risk management focuses on the difficulties in forecasting financial markets and reaching minimization of potential negative effects that could affect the financial results and position of the group.

Currency risk

Currency transactions are performed in Euro. The group does not use special risk hedging instruments, because the use of such instruments is not a common practice in the Republic of Bulgaria. Currency risk is minimized, because the BGN is fixed under the National Bank Act to euro in ratio BGN 1.95583: EUR 1.

Price risk

The group is exposed to price risk by two factors:

- a) any increase in supply costs of raw materials , and
- b) changes in the regulatory framework, related to RES and the purchase price of the electricity, regulated by the state.

To minimize this impact group implement a strategy aiming optimization of production costs, validation of alternative suppliers offering favorable terms of trade.

Credit risk

Financial assets, which potentially expose the group to a credit risk, are mainly trade receivables. The group shall be subjected to a credit risk in case clients do not pay their liabilities. The group policy in this area is aimed at sales of goods and services to customers with appropriate credit standing.

Liquidity risk

Liquidity risk is the negative situation when the group will not be able to meet unconditionally all its obligations in accordance with their maturity.

The group generates and maintains a sufficient amount of liquid funds. External sources of funding are the shareholders of the mother company. In order to isolate the potential liquidity risk, the group is working with alternative mechanisms of action and estimates, The final effect of which is to maintain good liquidity, respectively ability to fund its business activities. This is complemented by ongoing monitoring of the maturities of assets and liabilities and control of outgoing cash flows.

(k) Equity

Group equity amounts to BGN 550 553 000 /five hundred and fifty million and five hundred fifty-three thousand /

The share capital of the mother-company is BGN 547 563 000 / five hundred forty seven million five hundred sixty-three thousand /. Shareholders with more than 5% shareholding in the capital are the following:

Shareholders	31.12.2012			
	Number of shares	Value	Paid	% share
Mihail Georgopapadacos	148 916 457	148 916 457	148 916 457	27.19622
MakKap EAD	100 000 000	100 000 000	100 000 000	18.26274
MakCup Limited	64 322 971	64 322 971	64 322 971	11.74714
Rusneftkhim Black Sea Limited	64 321 171	64 321 171	64 321 171	11.74681
Royal Fund Bulgaria AD	44 000 000	44 000 000	44 000 000	8.03561
Total:	421 560 599	421 560 599	421 560 599	76.98851

The share capital of the group "Electron-Bulgaria" AD amounts to BGN 5 194 000 / five million one hundred ninety-four thousand /. The share capital of "Electron-Bulgaria" AD amounts to BGN 4 699 thousand and is 99.99% owned by the "Energoni" JSC.

"Electron-Bulgaria" has the following relative share of the capital of subsidiary companies:

(Thousand BGN)

Company	Amount of the share capital	Owned by the group		Foreign participation	
		Amount	%	Amount	%
RES Electric AD	100	100	100	-	-
Bolkan Solar AD	1 000	510	51	490	49
Eko Solar Energy AD	50	45	90	5	10
Total:	1 150	655		495	

The share capital of the group "Alpower-Bulgaria" AD amounts to BGN 8 122 000 / eight million one hundred twenty-two thousand /. The share capital of "Electron-Bulgaria" AD amounts to BGN 7 828 thousand and is 71.88% owned by the "Energoni" JSC.

"Electron-Bulgaria" has the following relative share of the capital of subsidiary companies:

(Thousand BGN)

Company	Amount of the share capital	Owned by the group		Foreign participation	
		Amount	%	Amount	%
Bolkan Energy AD	550	280	51	270	49
Sofia Wind Park AD	50	26	51	24	49
Total:	600	306		294	

The group manages its capital in such a way as to ensure its functioning as an alignment and to maximize shareholders returns through optimization of the debt-capital ratio (return on invested capital). The aim of the management is to maintain the thrust of investors, creditors and market and to guarantee for the future development of the group.

(I) Liabilities and provisions

Liabilities classification

As loans and liabilities initially occurred within the group are classified liabilities of a direct provision of goods, services, cash or cash equivalents of creditors.

Initially, these liabilities are reported at prime cost.

After initial recognition, loans and liabilities to suppliers and customers, which have no fixed maturity, are reported at prime cost.

Loans and receivables from customers and suppliers with a fixed maturity are reported at their depreciation cost. The effective interest rate is the original interest rate stated in the contract.

Liabilities to employees and insurance companies are classified as company liabilities related to already executed work by employees and respective insurance installment required by the legislation. According to IAS requirements liabilities include calculated short-term personnel incomes with unused by personnel leaves origin and liabilities to Social Insurance Funds, related to these incomes, calculated on effective social security rates basis. The company has no policy applied to charge long-term personnel incomes.

Provisions are calculated according to the best proximate management estimation regarding constructive and legal liabilities resulting from past events.

As short term liabilities are classified liabilities with:

- With no fixed maturity
- Fixed maturity and up to one year residual maturity term from the date of the financial statement.

As long term liabilities are classified liabilities that have fixed maturity and residual maturity of over a year term from the date of the financial statement.

Borrowings are initially recorded at their acquisition cost less relevant transaction costs. After initial recognition, borrowings are recorded at depreciation cost and every difference between acquisition cost and subsequent evaluation is reflected in the income statement on the effective interest rate basis for the period loan arise.

As of 31.12.2012 the personnel of the mother company comprises of 2 employee and the average personnel for the year is 2. The company makes use of services under civil contracts. From the other companies in the group personnel has only Bolkan Solar AD – three employees on labor contract.

Total:	112471	3020	115491

(p) Taxation:

The annual tax on profit comprises current and deferred tax. Current tax is the amount that shall be paid on taxable profit for the period and it is based on the effective tax rate or the operating tax rate at the day of balance sheet preparation and all corrections related to tax payable for previous years.

Deferred tax is calculated under the balance sheet assets and liabilities method applied to all time differences between the net book value and values calculated for financial purposes in accordance with the accounting reports.

Deferred tax is calculated on expected tax rates base that is applicable when the asset is realized or the liability is settled. The effect from tax rates changes on deferred tax is reported in the income statement, except for the cases when it relates to amounts previously calculated or directly reported in shareholder's equity

Deferred tax asset is recognized only to the amount that future profits are liable to be received and for which unused tax losses or tax credits are liable to be utilized. Deferred tax assets are reduced in compliance with the decrease in probability of tax profits realization.

As of 31.12.2012 the group has the following deferred tax assets and liabilities:

Deferred tax assets and liabilities	Energoni JSC	Elektron-Bulgaria AD	Alpower-Bulgaria AD	Total
Deffered tax assets	3804	34	57	3895
Deferred tax liabilities	-	3	-	3

(q) Cash flow statement

The adopted policy on reporting and recording of cash flows is based on the direct method. Cash flows are classified as cash flows when they are derived from:

- Operating activity
- Investment activity

- Financial activity

In the cash flow statement there are not any summary items.

(r) Report on changes in shareholder's equity

The adopted accounting policy requires statement preparation to include:

Net and loss profit for the period;

Balance of retained profit and changes for the period;

All revenues or expenses items and profit or loss items, resulting from IAS shall be recognized directly in the equity;

Cumulative effect of changes in accounting policy and fundamental mistakes in accordance with IAS 8;

Equity transfer and allocation between the shareholders;

Changes that have occurred as a result of alterations related to the elements of shareholders equity.

(s) Earnings per share

Basic earnings per share are determined on the basis of the net profit/(loss) for the period which is liable to allocation between shareholders with ordinary shares and weighted average number of outstanding ordinary shares for the reporting period. The weighted average number of outstanding ordinary shares is the number of outstanding ordinary shares at the beginning of the period, corrected by the number of re-purchased ordinary shares and the newly issued ones for the period, multiplied by the average time factor. This factor shows the number of days during which the shares have been retained compared to the total number of days in the period. Earnings per share that have decreased in value are not calculated, because potential ordinary shares have not been issued.
